
Dental care

Did you know that at the 1st Faculty of Medicine – Dental Clinic – you can take advantage of comprehensive dental care from higher-year students in the teaching rooms? Every step of the treatment is checked by an educator, and thus dental care of the highest quality is provided. A small disadvantage is the length of time you spend in the dentist chair for each visit, as students must wait for approval of an instructor after each procedure. The price for the treatment is according to the price list, which, considering the fact that you will still be treated by students, is more favourable for your wallet than at an ordinary dentist's office.

You can make an appointment at the following phone number: 224 964 384.
