
Vaccinations

The Vaccination Centre of the Clinic of Infectious Diseases and Travel Medicine of the CU 2nd Faculty of Medicine and Motol University Hospital offers students and employees of Charles University a 10% discount on all vaccines.

The Motol University Hospital Vaccination Centre provides both standard vaccines that are appropriate for our environment (tick-borne meningoencephalitis, hepatitis A/B, influenza), as well as vaccines suitable for travellers (yellow fever, typhoid fever, etc.).

In addition, we offer comprehensive travel advice.

Vaccine appointments are also available in the afternoon hours and on weekends. You can conveniently book vaccines or travel advice through the electronic reservation system: objednavky.fnmotol.cz.

With advanced notice, it is also possible in individual cases to arrange for a record of completed vaccines to use for internships abroad (email: ockovani@lfmotol.cuni.cz).
